Lady Lake, FL 32159

Dear Bob:

We have had your water purification system in our home for four weeks now, and I wanted take the time to write and let you know how pleased with are with your system.

First of all, the installation was so fast—we had clean water the very day we signed up. We really appreciate that you made sure the installation was just the way we wanted it.

We love many things about our new home in The Villages, but at the top of my list is the water quality. I use less soap/detergent and yet feel everything is cleaner and smells better. Our stainless steel sink shines with just a wipe of the cloth. I feel good drinking water from the tap, so I spend a lot less on bottled water. Food tastes better and best of all, I know it's healthier. Although we cannot see what's happening inside our water pipes and appliances, I believe we will find we will have fewer problems with those in the future by eliminating the corrosive elements in the water.

It is hard to make such a large investment, but my husband and I both feel it was definitely money well spent.

Sincerely,

Mary Devaney
